SUMMARY

Passionate cybersecurity enthusiast with a strong foundation in security fundamentals, penetration testing, and software & web application testing. Driven to identify vulnerabilities, secure applications, and work within cybersecurity frameworks to strengthen infrastructure security.

TECHNICAL SKILLS

Programming: Python, C++, C, JavaScript, SQL, Shell Scripting (Bash)

Cybersecurity: Penetration Testing, Threat Analysis, Network Security, Web App Security, Vulnerability Assessment (VA/PT), Attack Surface Management, OSINT, SIEM/SOAR Monitoring.

Security Tools: Burp Suite, Metasploit, Nmap, Wireshark, Amass, Nuclei, Sqlmap.

Frameworks & Dev: React.js, Node.js, Flask, Git/GitHub, Linux, REST APIs.

Soft Skills: Problem-Solving, Technical Writing, Team Collaboration, Adaptability.

WORK EXPERIENCE

Security Researcher — BloggersCon

June 2025 – Aug 2025

- Conducted threat intelligence research to analyze emerging threats and attack techniques.
- Participated in bug bounty programs to identify and report security vulnerabilities.

Pentesting Intern — YHills EdTech

June 2024 – Aug 2024

- Executed comprehensive penetration tests on various systems, identifying critical vulnerabilities.
- Utilized industry-standard methodologies to document security weaknesses and report findings.

PROJECTS

1. Behavioral Network Threat Detector — *Python, Scapy, React, Groq API (LLM)*

- Built a network packet capture and analysis tool using Scapy to monitor and inspect live traffic.
- Developed a dashboard UI using React and Flask to visualize packet data and traffic patterns.
- Integrated AI APIs (Groq) to analyze captured data and provide insights on network behavior.

2. Full-Spectrum Reconnaissance Framework — *Bash, Amass, Nuclei, Sqlmap, Ffuf*

- Engineered an automated pipeline for Attack Surface Management and asset discovery using Bash scripting.
- Orchestrated multi-tool scans (Nuclei, Sqlmap) to detect SQLi and XSS exposures.
- Automated Secret Discovery within JS files using LinkFinder to identify exposed credentials.

EDUCATION

Symbiosis Skills and Professional University

Expected May 2027

Bachelor of Technology in Computer Science & IT (Cybersecurity)

GPA: 9.0/10.0

- **Coursework:** Computer Networks, Ethical Hacking, Digital Forensics, Secure Development.

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cybersecurity Professional Certificate** (View Certificate)
- Ranked in the **Top 1 percent** globally on TryHackMe, showcasing practical security skills.
- Active participant in cybersecurity **CTF (Capture The Flag)** competitions and author of write-ups.
- Enthusiastic about researching emerging threats and analyzing threat intelligence.
