SUMMARY

Cybersecurity professional with hands-on expertise in web and mobile penetration testing, threat modeling, and vulnerability assessment. Proven ability to lead teams on security initiatives and deliver actionable threat analysis across diverse infrastructure and applications.

TECHNICAL SKILLS

Languages: Python, Shell Scripting (Bash), JavaScript, SQL, C/C++.

Cybersecurity Domains: Web & Mobile Penetration Testing, Attack Surface Management, Threat Intelligence, Vulnerability Assessment (VAPT), OSINT, API Security Testing, Mobile Security.

Offensive & Recon Tools: Burp Suite, Metasploit, Nmap, Wireshark, MobSF, Maltego, Autopsy.

Environment & Automation: Linux Administration, Git (Configuration Management), REST APIs, React, Flask, Docker, Code Review, Secure Coding.

WORK EXPERIENCE

Web App Security Tester Intern — Indian Cyber Security Solutions **June 2026 – July 2026**

- Led penetration testing teams on web and Android security assessments; delivered 15 vulnerabilities to real-world clients for remediation
- Executed static and dynamic analysis on 2 distinct application platforms; identified critical security flaws impacting production environments
- Structured assessment pipeline: 1-month training + 4 weeks hands-on testing (2 weeks web, 2 weeks mobile) enabling rapid technical proficiency

Security Researcher Intern — BloggersCon **June 2025 – Aug 2025**

- Led VDP (Vulnerability Disclosure Program) team initiatives; coordinated threat intelligence research that informed revenue-generating security content strategy
- Engineered automated reconnaissance framework leveraging Bash scripting and OSINT tools for attack surface discovery and asset enumeration
- Threat research outputs directly influenced organizational content development and threat intelligence offerings

Penetration Testing Intern — YHills EdTech **June 2024 – July 2024**

- Rotated through new industry security tools weekly (Burp Suite, Metasploit, Nmap, Wireshark); mastered multi-tool penetration testing workflows
- Final assessment: independently cracked 2 wrapped machines across separate operating systems; recovered credentials via exploitation techniques
- Intensive hands-on learning model enabling rapid skill acquisition across diverse security tools and attack methodologies

PROJECTS

1. Behavioral Network Threat Detector — *Python, Scapy, React, Flask, Groq API (LLM)*

- Deployed cross-platform network behavior analysis tool with high accuracy detection and optimized AI inference costs.
- Built scalable architecture supporting server, endpoint, and edge device deployments for enterprise-grade threat detection.
- Developed Flask dashboard to visualize packet data, traffic patterns, and AI-driven behavioral analysis in real-time.

2. Full-Spectrum Reconnaissance Framework — *Amass, Nuclei, Sqlmap, Ffuf, Wayback API*

- Engineered automated reconnaissance pipeline integrating 20+ security tools with deep-mode scanning for subdomain discovery.
- Automated Wayback Machine correlation to categorize URLs by exploitable vulnerability type for targeted testing.
- Orchestrated multi-tool scans to detect SQLi and XSS exposures; mapped active subdomains and attack surfaces.

EDUCATION

Symbiosis Skills and Professional University

Expected May 2027

Bachelor of Technology in Computer Science & IT (Cybersecurity)

GPA: 9.0/10.0

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cybersecurity Professional Certificate** (View Certificate)
- Ranked in the **Top 1 percent** globally on TryHackMe
- Led security assessment teams at Indian Cyber Security Solutions and BloggersCon, driving VDP initiatives and collaborative threat analysis.
- Actively engaged in emerging threat research, **Capture The Flag (CTF)** competitions, and documenting technical security write-ups.
